

Capability Statement

AVUM, INC.
CAGE CODE: 3F6V6
UEI: SJ18PGX2SNY5

About Us

Curiosity drives us, precision defines us, and passion fuels everything we build. We're a team of engineers and innovators dedicated to transforming complex challenges into elegant solutions. Where others see limits, we see opportunities to redefine what's possible.

Core Capabilities

Mission Engineering

Building intelligent, user-centric software with agile development and AI.

User-Focused Adoption

Ensuring seamless technology adoption with training, migration, and support.

Infrastructure & Cybersecurity

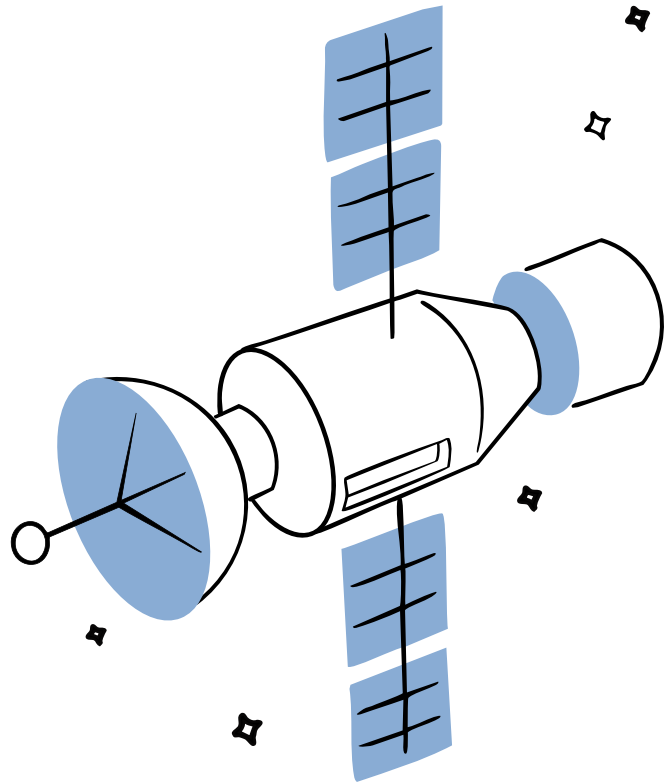

Engineering secure cloud infrastructure with DevSecOps and threat detection.

Predictive Analysis & Business Intelligence

Turning complex data into actionable intelligence and decision support tools.

Enterprise Process Engineering

Optimizing efficiency with workflow automation and business process engineering.

Company Information

Primary NAICS: 541512 - Computer Systems Design
Small Disadvantaged Business
Minority-Owned Small Business

Contract Vehicles

GSA MAS (47QTCA21D00DR)
Seaport-NxG (N00178-19-D-7213)
IDIQ Enterprise Personnel Systems Engineering (EPSE)

Accreditations

CMMI Appraised - ML3 - Software Development
Appian Acquisition Accredited - Silver Tier

“Avum's commitment to excellence was proven on day one and carried true throughout the 5-year lifespan of the contract. Throughout the entire life of this contract, the quality of Avum's work has been nothing short of exceptional.”

- Department of the Navy Customer

Our Solutions

- 

User Solutions
User-friendly solutions through human-centered design & human factors engineering
- 

Leadership Support
Our customers get the attention of our entire organization, including our founder and CEO
- 

Empowerment & User Focus
We challenge & empower our team to be ambitious & thorough in solution development
- 

Innovative Technology Solutions
Iteratively delivering capabilities to our customers
- 

Modular Solutions
Flexible tech solutions with modular open systems to drive essential innovation where it's needed most
- 

Rapid Prototypes
Enabling customers to see & interact with solutions faster than ever
- 

Advanced Data Solutions
Balancing advanced design with modularity to maximize functionality & minimize data duplication
- 

Secure Infrastructure
Secure, scalable solutions designed for government & commercial cloud environments

Our Customers

- Department of the Navy**

ASN (RDA)	CNIC	NAVSISA
DASN(P)	CNRC	NAVSEA
PEO MLB	NAVFAC	NAVAIR
USMC	NPS	ONR
NAVWAR	NAVSUP	BUMED

Commercial Customers

ATOM	Canon USA
Domtar Corporation	
FUJIFILM	Eclaro International
Integrity PCB Design, Inc.	
- Department of Defense**
